To the parents/guardians of pupils at PrO Almere

Computers and id cards

At PrO Almere, a computer is used at school and at home to support school education and also for distance learning (for example during the corona crisis).

The programs we offer are all web-based, which means that pupils can access them via the internet using a login and password.

What programs do we use?

- Nieuwsbegrip for Dutch
- Deviant for maths, in particular, the digital Studymeter package
- Groove Me for English
- Throughout the year, the pupils have method-independent digital tests to check their learning levels
- Throughout the year, the pupils can use Office 365, which includes a complete Word package, use of PowerPoint, Excel and data storage in One Drive
- IT lessons are offered in a course form, this is based on pupil choice
- Finally, the pupils have their own mailbox

What is BYOD?

That is short for Bring Your Own Device (a laptop or tablet with which you can access the internet and use the programs).

The pupils can use the school Wi-Fi for free. We expect pupils to have access to a device that can use the above programs via Wi-Fi. We prefer the pupils to have a Microsoft device (tablet or laptop), but pupils can also work with an Android tablet or an iPad.

Please e-mail byodvragen@proalmere.asg.nl if you have any questions about the above.

ID cards

At PrO Almere, access to school and printing/copying for pupils is done with a school id card. These id cards are issued after the school photographer has been to take new passport photos.

If you have any questions about the above, please do not hesitate to call:
